Indicator used in below example set file can be downloaded from above UEA group. Indicator Name is 'IndicatorWithBufferArrow'

Configure with your Indicator name and buffers found for Buy and Sell Signals and click ok

Variable	Value	
ab Indicator to Use (Replace with Your Indicator Name/Path)	IndicatorWithBufferArrow	
111 Indicator Buy Signal Buffer Index	0	
🛤 Indicator Sell Signal Buffer Index	1	
//Candle to Check for Indicator Signal (0 = current candle)	0	
No Of Candles to Check	50	
		load

Then drag your indicator in to chart.

I your settings are right for buffers both indicator signals and checker tool signals will be at same candle and position

IMPORTANT!! – Test in strategy tester and make sure it is working fine. Because many indicators repaints and give different signal in realtime.
